

K. B. PAVITH KAVISIKA

+94718827129 | kbpkavisika@gmail.com | [LinkedIn](#) | [Github](#) | [Portfolio](#)

Skills

Programming Languages: Java, Python, JavaScript, TypeScript, SQL, Bash

Frameworks & Libraries: React, Node.js, Express.js, Next.js

Databases: MySQL, MongoDB, PostgreSQL

Tools & Platforms: Git, GitHub, Docker, Postman, Apache Tomcat, Figma, Android Studio

Achievements

- 1st Runners Up – SLIIT Codefest 2025 Revivention competition.
- Finalists at HackX national hackathon – University of Kelaniya and Ministry of Science and Technology

Certifications

- JavaScript for beginners -Simplilearn (Credentials 9535514)
- AI/ML Engineer stage 1 – SLIIT (Credentials jvbdnra6e9)
- AI Python for beginners (Credentials 9575212)
- Getting started with Docker (Credentials 9741272)

Education

Sri Lanka Institute of Information Technology (SLIIT)

Oct 2023 – present

BSc (Hons) in Information Technology, Specializing in Software Engineering

Academic achievements - CGPA 3.0 | Best Semester : 3.54

Mahanama College (Colombo)

Year 2022

Projects

ZFit – Gym Management System

Jul 2025 – Oct 2025

Tech Stack: Next.js, React, Node.js, Express.js, MongoDB, Tailwind CSS, JWT, PayHere, REST API, TypeScript, Git

- Developing a comprehensive **payment management** system with modules for payments, invoices, and refunds to streamline financial operations.
- Building **responsive dashboards** for members with attendance logs, payments, and personal data.
- Added **PayHere integration** for secure subscription management.

GitHub Repository: <https://github.com/kbpkavisika/ZFit>

ResQ – National Disaster Platform | SLIIT Codefest Revive nation – 1st Runners Up
2025

Jul 2025 – Aug

Tech Stack: Node.js, Express, MongoDB, Mongoose, React, React Native, TypeScript, Recharts, Tailwind CSS, JWT

Designed a **full-stack MERN application** and **React Native mobile app** enabling disaster alerts, SOS requests, and real-time resource allocation.

- A lightweight prototype was tested during **cyclone emergency response simulations**.
- Collaborated with Ministry of Digital Economy and ICTA to integrate **government APIs (SLUDI, Commercial Bank PayDPI, mock NDX)** for disaster data, payments, and inter-agency coordination.

- Built a MERN-based web app and React Native mobile app for real-time disaster tracking, alerts, resource coordination, SOS signals and responder assignment.

GitHub Repository: <https://github.com/disaster-response-sl/national-disaster-platform>

Ceylon Smart Citizen (Tech-Triathlon by Rootcode)

Jul 2025 –

Aug 2025

Technologies: Node.js, Express, PostgreSQL, Next.js, Docker, Python, pandas, scikit-learn, NumPy, joblib

- Engineered a full-stack digital governance platform featuring a **secure microservices backend** and an ML-powered resource optimization pipeline, consolidating 20+ services.
- Developed two ML models.
 - **Service Time Prediction** (HistGradientBoostingRegressor): Achieved R-squared ≈ 0.85
 - **Staffing Forecast** (RandomForestRegressor): Forecasted employee needs with $\sim 1-2$ staff variance.

GitHub Repository: <https://github.com/CeylonSmartCitizen>

PlayNova – Online Game Store

Mar 2025

– Apr 2025

Tech Stack: Java, JSP, Servlets, MySQL, JDBC, Apache Tomcat, CSS, JavaScript

- Implemented an **announcement management** module with full CRUD operations to publish and update upcoming game releases.
- Applied **MVC design principles** with Singleton pattern for secure JDBC connections.
- Delivered a **scalable architecture** for reliable and maintainable growth.

GitHub Repository: <https://github.com/gaindunguhansith/playnova>

Cabin.com – Hotel Reservation Platform

Sep 2024

– Oct 2024

Tech Stack: HTML, CSS, PHP, MySQL

- Developed a secure **reservation system** with user profiles, supporting CRUD operations for bookings.
- Designed a **mobile-friendly responsive interface** for hotel reservation management.

ZerraLabs – AI Product Photography Platform (Ongoing)

- Developing an AI-based SaaS tool that transforms user-uploaded product photos into high-quality professional images.
- Contributing to product strategy, feature development, and early user acquisition efforts.
- Building proprietary AI models to automate background enhancement, lighting correction, and styling.
