

K. B. PAVITH KAVISIKA

Colombo , Sri Lanka | +94 71 882 7129 | kbpkavisika@gmail.com | [LinkedIn](#) | [Github](#) | [Portfolio](#)

Skills

Programming Languages: Java, Python, JavaScript, TypeScript, SQL, Bash

Frameworks & Libraries: Spring Boot, React, React Native, Next.js, Node.js, Express.js, JSP, Servlets, Tailwind CSS

Databases: MySQL, PostgreSQL, MongoDB, SQLite

Tools & Platforms: Git, GitHub, Docker, Kubernetes, Postman, Apache Tomcat, Electron, Expo, Android Studio, Figma

Projects & Experience

ZFit – Gym Management System

Jul 2025 – Oct 2025

Tech Stack: Next.js, React, Node.js, Express.js, MongoDB, Tailwind CSS, JWT, PayHere, REST API, TypeScript, Git

- Architected a **full-stack gym management platform** with dedicated modules for payments, invoicing, and refunds, streamlining end-to-end financial operations.
- Built responsive, **role-based member dashboards** displaying attendance logs, payment history, and personal profile data.
- Integrated the **PayHere payment gateway** with JWT-secured REST APIs to enable secure, automated subscription billing and renewals.

GitHub Repository: <https://github.com/kbpkavisika/ZFit>

ResQ – National Disaster Platform | SLIIT Codefest Revive nation – 1st Runners Up

Jul 2025 – Aug 2025

Tech Stack: Node.js, Express, MongoDB, Mongoose, React, React Native, TypeScript, Recharts, Tailwind CSS, JWT

Designed and developed a **full-stack MERN web app** and **companion React Native mobile app** for real-time disaster alerts, SOS requests, and resource allocation.

- A lightweight prototype was tested during **cyclone emergency-response simulations**.
- Collaborated with Ministry of Digital Economy and ICTA to integrate **government APIs (SLUDI, Commercial Bank PayDPI, mock NDX)** for disaster data, payments, and inter-agency coordination.
- Built a MERN-based web app and React Native mobile app **for real-time disaster tracking, alerts, resource coordination, SOS signals and responder assignment**.

GitHub Repository: <https://github.com/disaster-response-sl/national-disaster-platform>

eDoc – Smart Healthcare Platform (Microservice)

Feb 2026 – Apr 2026

Tech Stack: Spring Boot, Java, Docker, Kubernetes

- Developing a cloud-native telemedicine platform for patient management and healthcare services.
- Designed and implemented the Patient Management Service for profile management and medical report handling.
- Built a Notification Service for real-time email and SMS alerts.
- Developed RESTful APIs with Spring Boot following microservices architecture principles.

GitHub Repository: <https://github.com/kbpkavisika/eDoc>

Ceylon Smart Citizen (Tech-Triathlon by Rootcode)

Jul 2025 – Aug 2025

Technologies: Node.js, Express, PostgreSQL, Next.js, Docker, Python, pandas, scikit-learn, NumPy, joblib

- Engineered a full-stack digital governance platform featuring a **secure microservices backend** and an ML-powered resource optimization pipeline, consolidating 20+ services.
- Developed two ML models.
 - **Service Time Prediction** (HistGradientBoostingRegressor)
 - **Staffing Forecast** (RandomForestRegressor)

GitHub Repository: <https://github.com/CeylonSmartCitizen>

StockUp – Cross-Platform Inventory Management System

Apr 2026

Tech Stack: React, TypeScript, Electron, React Native, Expo, SQLite, Tailwind CSS, Vite, Git

- Architected a **cross-platform inventory management system** with dedicated **desktop (Electron)** and **mobile (React Native/Expo)** clients sharing a common offline-first data layer.
- Built an embedded **SQLite data layer** (better-sqlite3 / expo-sqlite) enabling full inventory tracking, search, and validation without dependency on a remote backend.
- Designed responsive, platform-specific UIs with Tailwind CSS, optimizing layouts and interactions separately for desktop and mobile form factors.

GitHub Repository: <https://github.com/kbpkavisika/StockUp>

PlayNova – Online Game Store

Mar 2025 – Apr 2025

Tech Stack: Java, JSP, Servlets, MySQL, JDBC, Apache Tomcat, CSS, JavaScript

- Implemented an **announcement management** module with full CRUD operations to publish and update upcoming game releases.
- Applied **MVC design principles** with Singleton pattern for secure JDBC connections.
- Delivered a **scalable architecture** for reliable and maintainable growth.

GitHub Repository: <https://github.com/gaindunuhanisith/playnova>

Achievements

- **1st Runners Up** – SLIIT Codefest 2025 Revivention competition
- **Finalists at HackX national hackathon** – University of Kelaniya and Ministry of Science and Technology

Certifications

- JavaScript for beginners -Simplilearn (Credentials 9535514)
- AI/ML Engineer stage 1 – SLIIT (Credentials jvbdnra6e9)
- AI Python for beginners (Credentials 9575212)
- Getting started with Docker (Credentials 9741272)

Education

Sri Lanka Institute of Information Technology (SLIIT)

Oct 2023 – present

BSc (Hons) in Information Technology, Specializing in Software Engineering

Academic achievements - CGPA 3.01 | **Best Semester : 3.54**

Mahanama College (Colombo) G.C.E. Advanced Level (Maths Science Stream)

Feb 2022
